

Digital Sovereignty Maturity Assessment

Short Format: Focused 2-hour assessment session

Session Details

Duration: 2 hours

Format: Virtual or on-site

Date: [To be scheduled]

Focus: Assessment-only format with brief introduction

⚠ Note: This shortened format focuses on completing the assessment quickly. For a comprehensive workshop including context-setting, detailed domain education, and in-depth results analysis, consider the **Full-Day Workshop** format instead.

Required Participants

- **Essential:** CIO/CTO, CISO, Cloud Infrastructure Lead
- **Recommended:** Chief Architect, Compliance Officer, Operations Manager
- **Red Hat:** Digital Sovereignty Architect, Account Team

Detailed Agenda

0:00 - 0:15 (15 min)**Introduction & Framework Overview**

- Quick introductions and participant roles
- Brief overview of the 5-level maturity model
- Introduction to 7 Digital Sovereignty domains
- Assessment methodology and scoring explanation
- Selection of industry profile (LOB weighting)
- Ground rules for efficient assessment

0:15 - 1:45 (90 min)**Domain Assessment (All 7 Domains)****Rapid assessment across all 7 domains (~15-18 minutes per domain):**

1. **Data Sovereignty** - Residency, protection, key management, data access
2. **Technical Sovereignty (including Open Source sub-pillar)** - Stack ownership, vendor lock-in, portability, open source strategy
3. **Operational Sovereignty (including Managed Services sub-pillar)** - Skills, processes, autonomy, DR/BC, vendor controls, exit planning
4. **Assurance Sovereignty** - Audits, monitoring, compliance verification
5. **Executive Oversight** - Governance, budget, accountability

Note: Open Source and Managed Services are assessed as integrated sub-pillars within Technical and Operational Sovereignty respectively.

For each domain:

- Focus on Foundation tier questions (1-3) first - these are mandatory
- Address Strategic tier questions (4-6) if time permits
- Note Advanced tier questions (7-8) for follow-up if running short on time
- Request evidence but keep discussions brief
- Flag items for deeper discussion in follow-up

1:45 - 2:00 (15 min)

Quick Results Review & Next Steps

- Display spider chart with overall results
- Highlight top 3 strengths and top 3 gaps
- Identify 2-3 quick wins
- Schedule comprehensive results review session (recommended within 1 week)
- Export results for detailed analysis
- Next steps and follow-up actions

Time Management Tips

- **Strict time limits:** ~2 minutes per question maximum
- **Evidence-based scoring:** Ask for quick examples, not detailed explanations
- **"Parking lot" discussions:** Note detailed topics for follow-up rather than exploring now
- **Focus on Foundation tier:** Complete questions 1-3 in each domain first, then tackle Strategic/Advanced if time permits
- **Pre-work helps:** If participants review domain descriptions beforehand, assessment goes faster

Pre-Session Preparation

To expedite the assessment, please have ready:

- Current cloud provider(s) and regions in use
- Data classification framework (if exists)
- List of key vendors with data access
- Compliance certifications (ISO 27001, SOC 2, etc.)
- Disaster recovery approach summary

Expected Outcomes

- **Initial baseline:** Maturity scores across 7 domains
- **Visual results:** Spider chart showing relative strengths/gaps
- **High-level insights:** Preliminary understanding of sovereignty posture
- **Follow-up plan:** Scheduled detailed review and roadmap session

Recommendation: Schedule a 1-hour follow-up session within 1 week to review detailed results, discuss implications, and develop prioritized improvement roadmap.

Follow-up Options

After completing this short assessment, consider:

- **Results Deep-Dive (1 hour):** Detailed review of scores, gap analysis, prioritization
- **Roadmap Planning (2 hours):** Develop actionable improvement plan with timelines
- **Domain-Specific Workshops:** Deep-dive into specific domains with low scores
- **Full-Day Workshop:** Comprehensive sovereignty education and planning session
